# turn on

durable, modern elegance

- 50,000-hour life span
- Fully dimmable
- Warm white/white/RGB colors
- Compact fixtures
- Multiple trim colors

# catch on

LEDs outperform CFLs

- LEDs consume less energy than CFLs
- LEDs save more on energy costs
- LEDs last 5x longer than CFLs
- LEDs have more light output
- LEDs are used in more applications

Recessed light

Panel light

Directional recessed light

This home features Rimikon extra low voltage 24V DC LED recessed lights in warm white ([RIM-215ww](#)).

## save on waste, energy and costs

- Installation cost savings
- Less energy use
- Lower energy costs
- More energy rebates
- Less frequent replacements

## count on a safer, healthier environment

- Zero toxic mercury
- No shock or burn risks
- No UV radiation
- Minimal EMF pollution
- Recyclable materials

Strip lights

Cabinet lights

Flood light

Patented Rimikon extra low voltage LED lights are designed to significantly lower operational and maintenance costs. They are low energy, long lasting, 100% recyclable, and certified as safe to self-install.

## Fully Dimmable, Extra Low Voltage 24V DC 7.5W/12.5W, 4" Diameter LED Recessed Lights

**Applications/Product Description:** Rimikon patented LED recessed lights (also known as LED downlights, pot lights or can lights) can be installed on ceilings, under arches, and even in high-moisture areas such as over bathtubs and above shower stalls. They are equally versatile for outdoor use, including under roof eaves to illuminate balconies, patios, landscape features, and water features.

Drawing just 7.5W–12.5W to put out 535–850 lumens, Rimikon's patented extra low voltage recessed lights will last up to 50,000 hours (17 years at 8 hours per day), consuming less energy and saving substantially more on energy costs than compact fluorescent lights (CFLs) and traditional, higher voltage LED lights.

**RIM-209ww**

(7.5W Rimikon LED recessed light, warm white)

**RIM-209w**

(7.5W Rimikon LED recessed light, white)

**SPECS AND DETAILS:**

- Input Voltage: 24V DC
- Output: 24V DC
- Lumens: 535 (7.5W) or 850 (12.5W)
- Kelvins: 2,900 (warm white) or 3,200 (white)
- Rated power: 15-36V DC, 310mA (7.5W) or 18-36V DC, 490mA (12.5W)
- LED Count: 3 Cree LED (7.5W) or 5 Cree LED (12.5W)
- CRI: 81
- One 24V DC 4A power supply can power up to eight 7.5W or six 12.5W LED recessed lights
- Cutout hole should be 3-3/4" or 4"
- No metal back box required, (product is IC rated)
- Certified to be used with extra low voltage 14/2 stranded wire
- Trim color: white (optional brown or black)
- Certifications: UL/CUL (Class 2), and Energy Star
- Warranty: 5 years

**RIM-215ww**

When building new homes, it makes dollars and sense to make the switch to extra low voltage LED lights. Ready to start saving on your energy bills?

## Fully Dimmable, Extra Low Voltage 24V DC 12.5W, 4" Diameter LED Directional Lights

**Applications/Product Description:** Create dramatic or dimmable effects with Rimikon LED directional lights (also known as LED adjustable downlights or LED gimbal lights). Designed for ceilings (indoor use only), Rimikon LED directional lights can be pointed in any direction—wherever you need warm white or white ambient, accent or task lighting. They can be installed as recessed lights or as track lighting.

Drawing just 12.5W to put out 850 lumens, Rimikon's patented extra low voltage directional recessed lights consume less energy and save substantially more on energy costs than compact fluorescent lights (CFLs) and traditional, higher voltage LED lights. Replacement won't be necessary for up to 50,000 hours.

#### SPECS AND DETAILS:

- Input Voltage: 24V DC
- Output: 24V DC
- Lumens: 850
- Kelvins: 2,900 (warm white) or 3,200 (white)
- Rated power: 8-36V DC, 490mA
- LED Count: 5 Cree LED
- CRI: 81
- One 24V DC 4A power supply can power up six 12.5W LED directional lights
- Can be installed as recessed lights or as track lighting
- Cutout hole should be 3-3/4" or 4"
- No metal back box required, (product is IC rated)
- Certified to be used with extra low voltage 14/2 stranded wire
- Trim color: white
- Certifications: UL/CUL (Class 2), and Energy Star
- Warranty: 5 years

Saint Paul University installed 2' x 2' (0.6 m<sup>2</sup>) LED panel lights in several of its classrooms. Feedback from students and staff reported not only a more natural quality of light, but the dimmable, flicker free features caused less eye strain and fewer headaches. The energy savings were so quickly realized that Saint Paul University will keep using Rimikon products during its next phase of renovations.

## Fully Dimmable, Extra Low Voltage 24V DC 45W, 2' x 2' LED Panel Lights

**Applications/Product Description:** Rimikon 2' x 2' LED panel lights are low energy, long lasting, recyclable, and safe to install in indoor T-bar (grid) and flush ceilings. Transform lobby and reception areas, meeting rooms, multi-purpose spaces, and high traffic walkways in office buildings and commercial towers. Improve and enhance lighting conditions in educational settings for optimized focus, vision, health, and wellbeing. Brighten, dim or apply accented LED lighting to showcase products, motivate sales, optimize energy savings, and enhance security at shopping destinations. Support the quality of care offered by healthcare and wellness facilities by providing durable, dependable lighting systems that are flicker free and fully dimmable.

Drawing just 45W to put out 4,400 lumens of warm white or natural white color temperature, Rimikon's patented extra low voltage panel lights can brighten or dim any room using wall mount or wireless dimming control.

**RIM-PANEL-26-DC-4K**  
**RIM-PANEL-26-DC-5K**

**SPECS AND DETAILS:**

- Input Voltage: 24V DC
- Output: 24V DC
- Lumens: 4,400
- Kelvins: 4,000 (natural white light) or 5,000 (daylight)
- Rated power: 45W
- LED Count: 264
- One 24V DC 4A power supply can power up to two LED panel lights
- Certified to be used with extra low voltage 14/2 stranded wire
- Certifications: UL/CUL (Class 2), DLC, and FCC
- Warranty: 5 years

**APPLICATIONS:** see page 8

## Fully Dimmable, 24V AC, 40W, 1' x 4', 2' x 2' and 2' x 4' LED Panel Lights

**Applications/Product Description:** When all you want is an energy efficient LED panel light with a standard power supply and wiring, Rimikon 1' x 4', 2' x 2' and 2' x 4' LED panel lights draw just 40W to put out 4,400 lumens of warm white, natural white or daylight color temperature. The panel is fully dimmable, lasts up to 50,000 hours and is 100% recyclable.

Whether it's an office building or commercial tower, a hospitality or shopping destination, an educational setting or a healthcare facility, Rimikon's panel lights can brighten or dim any room or space using wall mount or wireless dimming control. Make the switch to LED and start saving energy, maintenance and costs.

Rimikon lights have been installed in Tamarack Homes since 2010. The Construction Manager at [Tamarack Developments](#), says, "Innovations like Rimikon extra low voltage LED lights are helping us reduce our carbon footprint in safe, affordable, and stylish ways."

## Fully Dimmable, Extra Low Voltage 12V DC 2.5W, 2-3/4" Outer Diameter LED Cabinet Lights

**Applications/Product Description:** Bring the modern elegance of Rimikon extra low voltage LED cabinet lights into your home. Installed under counters or cabinets, they cast a flicker free, warm white color temperature with fully adjustable brightness using wall mount or wireless dimming control. Trim colors include white, silver, black or brushed nickel. Under counter or under cabinet brackets are also available.

Rimikon LED cabinet lights are also ideal for providing accent lighting on collections or valuables inside china cabinets, hutches or curio cases. Each Rimikon extra low voltage LED cabinet light only draws 2.5W of power to put out 140 lumens, saving you substantial energy costs. When you install Rimikon extra low voltage cabinet lights, you won't need to worry about maintenance or replacements for up to 50,000 hours.

#### SPECS AND DETAILS:

- Input Voltage: 12V DC
- Output: 12V DC
- Lumens: 140
- Kelvins: 2,900 (warm white)
- Rated power: 12V DC, 223mA, 2.5W
- LED Count: 1 Cree LED
- Requires a 12V DC power supply
- Powers up to 12 LED cabinet lights (on a 3A power supply) or 18 LED cabinet lights (on a 5A power supply)
- Certified to be used with 18/2 extra low voltage stranded wire
- Dimensions: 2-3/4" x 7/16"
- Install in a recessed cutout of 2-1/4" or surface mounted with optional bracket
- Bezel size: 1/2"
- Under counter or under cabinet brackets also available
- Certifications: UL/CUL (Class 2), and Energy Star
- Warranty: 1 year

Rimikon extra low voltage LED strip lights can be installed directly on a clean, smooth surface or in an optional aluminum bracket. Our 16.4 ft rolls are flexible, self-adhesive, and can be cut into different segments (approximately every 2").

## Fully Dimmable, Extra Low Voltage 12V DC Flexible Indoor or Outdoor Single Color LED Strip Lights

**Applications/Product Description:** Set the mood in any indoor or outdoor environment by installing fully dimmable Rimikon single color LED strip lights. Available in rolls of 16.4 ft, the thin profile of the LED strip lights combined with a flexible, self-adhesive backing makes them easy to install in homes, bars, restaurants, architectural or artistic display areas, balconies, patios, and near landscape or water features. Get creative and apply to toe kicks, above cabinets, in elevators, on stairs, around mirrors, in closets, and in conjunction with crown molding.

Rimikon LED strip lights emit beautiful warm white or white color temperatures. When you choose extra low voltage, you are getting low energy consumption and a healthy, safe and vibrant lighting solution for any lighting project.

Did you know that RGB LED lights are being purchased by more and more municipalities, businesses and homeowners to decorate indoor and outdoor Christmas trees and holiday event venues?

## Fully Dimmable, Extra Low Voltage 12V DC Flexible Indoor or Outdoor RGB LED Strip Lights

**Applications/Product Description:** Get in the festive spirit by installing fully dimmable Rimikon RGB (red, green and blue) color LED strip lights in homes, bars, restaurants, shopping destinations, offices, architectural or artistic display areas, balconies, patios, and entranceways. Decorate trees, landscape features and party venues.

What distinguishes Rimikon RGB strip lights is that once you download the Rimikon Android or Apple iOs app, you can control color changes manually or automatically, set a timer, set the lights to music, make the lights voice activated, or feature a particular color. Available in rolls of 16.4 ft, the thin profile of the LED strip lights combined with a flexible, self-adhesive backing makes installation easy and fast.

**RIM-STR17-RGB**  
(indoor/outdoor, red, green and blue colors)

#### SPECS AND DETAILS:

- Input Voltage: 12V DC
- Output: 12V DC
- Lumens: 1,800
- Kelvins: RGB
- Rated power: 36W (1.5W/foot)
- LED Type: 5050
- LED Quantity: 150/roll
- Roll: 16.4 ft
- Requires a 12V DC power supply
- Powers up to 16.4 ft (1 roll) of LED strip lights (on a 3A power supply) or up to 32.8 ft (2 rolls) of LED strip lights (on a 5A power supply)
- Rolls can be cut into different segments (approximately every 7.5")
- LED strips can be installed as is or using an optional aluminum bracket
- Certifications: UL/CUL (Class 2)

Rimikon products have the same esthetic look as other brands. What distinguishes us is that we design and test our own products in Ottawa, and we are consistently following through with top quality, competitive pricing, and availability.

## Aluminum Profiles for LED Strip Lights

**Applications/Product Description:** Rimikon aluminum profiles (also known as aluminum extrusions) for LED strip light applications deliver light in a smooth and continuous way. Install them on walls, under cabinets, on stairs, etc. Most aluminum profiles offer clear, frosted or white plastic cover options.

**RIM-AP5528**  
bull nose x 2.5" W x 78.5" L

**SPECS AND DETAILS:**

- Length is 78.5"
- Comes with four surface mount clips and two end caps
- Additional end caps and mounting clips are sold separately in boxes of 10 each
- Use with Rimikon single color or RGB color strip lights (indoor or outdoor)

**APPLICATIONS:** see page 20

All Rimikon LED lights are flicker free with full dimming control, allowing you to adjust the brightness at any time of day or night. Our lights work well in all temperatures, including during cold winters.

## Fully Dimmable, Extra Low Voltage 24V DC 10W LED Flood Lights

**Applications/Product Description:** Rimikon extra low voltage LED flood lights can be used to accent a wide range of architectural and outdoor landscape features. Use to illuminate building facades, canopies, walkways, landscape features, water features, emergency pathways, parking lots, and building signage.

Drawing only 10W of power to put out 700 lumens of warm white color temperature, Rimikon extra low voltage LED flood lights will go on and stay on for up to 50,000 hours, saving you significantly more energy, operational, and maintenance costs than carbon fluorescent lights (CFLs) and traditional, higher voltage LED lights.

### **RIM-FL24**

#### **SPECS AND DETAILS:**

- Input Voltage: 24V DC
- Output: 24V DC
- Lumens: 700
- Kelvins: 3,000 (warm white)
- Rated power: 10W
- Requires a 24V DC 4A power supply
- Powers up to 6 LED flood lights
- Certified to be used with 14/2 extra low voltage stranded wire
- Certifications: UL/CUL (Class 2), IP65
- Warranty: 1 year

**APPLICATIONS:** see page 22

- PWM (pulse width modulation)
- 1-Gang Decora style
- Wall mounted
- Requires 14 AWG, 2 conductor stranded wire
- Certifications: UL/CUL (Class 2)
- Warranty: 1 year

**RIM-SW12/24**  
 (12V or 24V DC Decora style  
 single and 3-way switch in one)

- Input Voltage: 12V/24V DC, 8A/4A max
- Output: 12V/24V DC, 8A/4A
- Use with 14 AWG, 2 conductor stranded wire
- Certifications: UL/CUL (Class 2)
- Warranty: 1 year

**RIM-1FP**  
 (Decora style single  
 gang faceplate)

- Color: White
- Compatible with Rimikon LVD2 dimmer or the RIM-SW12/24 LED light switch

## Extra Low Voltage LED Controls

**RIM-PHC24**  
(24V photo cell for dusk 'til dawn lighting)

- Input Voltage: 24V DC, 4A
- Output Voltage: 24V DC, 4A
- Recessed and single gang application
- Certifications: UL/CUL (Class 2)
- Warranty: 1 year

**RIM-RGBC**  
(24-key infrared controller for RGB strip lights)

- Input Voltage: 12V DC, 8A
- Output: 12V DC, 8A
- Surface mount
- Warranty: 1 year

**RIM-ROT-DIM**  
(12V rotary dimmer for cabinet and strip LED lights)

- Input Voltage: 12V DC, 5A/3A
- Output Voltage: 12V DC, 5A/3A
- Surface mount
- White or black
- Warranty: 1 year

**RIM-EXT**  
(extender to double load lights)

- Input Voltage: 100V to 12V/24V DC, 8A/4A
- Output: 12V/24V DC, 8A/4A
- Use with 12V DC or 24V DC power supplies
- Warranty: 1 year
- Note: It will not exceed Class 2 certification standards during installation

## Extra Low Voltage Hanging LED Panel Accessories

**RIM-R26SM**  
(surface mount frame)

- Slides inside the surface mount frame

**RIM-R26CSC**  
(ceiling suspension kit)

- Hang flat panel with adjustable wires

**RIM-R26TBC**  
(spring clip)

- 4-pack
- Attaches to the back of the panel
- Ideal for drywall ceilings

**RIM-R26CM**  
(chain mount bracket)

- Secure the flat panel with chains or wire

## Extra Low Voltage LED Accessories

**RIM-RF7.5**  
 (retrofit adapter ring for recessed lights, 7.5" outer diameter)

**RIM-RF6.25**  
 (retrofit adapter ring for recessed lights, 6.25" outer diameter)  
 • Available in white only

**RIM-PL-RING-DB** (dark brown)  
**RIM-PL-RING-BL** (black)

- This is a special order if dark brown or black are preferred
- Same 4" trim as the standard white color trim on recessed lights
- Material: Aluminum
- Warranty: 1 year

**RIM-CAB-BRK**  
 (cabinet bracket)

**RIM-RI-BRK**  
 (rough-in bracket for recessed lights)

**RIM-FT4-W18/2**  
 (18 AWG, 2 conductor extra low voltage stranded wire, 1,000 ft roll)

**RIM-FT4-W14/2**  
 (14 AWG, 2 conductor extra low voltage stranded wire, 500 ft roll)

**RIM-TMAD**  
 (female 2.5 mm LED power adapter jack)

## DID YOU KNOW?

Compared to traditional compact fluorescent lights (CFLs), LEDs produce a higher light output per watt, consume less energy, and are used in more applications. They present no shock or burn risks, contain zero toxic mercury or UV radiation, and emit very little EMF pollution. Rimikon lights were designed to be even more efficient than traditional LED lights—up to 15% more efficient—and will last about five times longer than CFLs.

lights  
ON

Rimikon is an innovative lighting and lighting design company that is passionate about integrating cost-saving, energy-efficient, and environmentally sustainable technologies and solutions into our everyday lives.

It was first in line to introduce patent-protected ELV (extra low voltage) LED lighting products, power supplies, controls and accessories to the North American market.
